

# Arrowhead Regional Computing Consortium Shared Filtering Elections

ISD \_\_\_\_\_ elects to utilize the shared filtering option through ARCC and makes the following elections:

## Election 1:

Districts can choose to block any or all of the 76 iPrism categories of web sites. Please put a  $\sqrt$  in the "block" (*bl*) check box next to each category you choose to block.

## Election 2:

Districts can choose to monitor any or all of the 76 iPrism categories of web sites. Please put a  $\sqrt$  in the "monitor" (*m*) check box next to each category you choose to monitor. By selecting to monitor a category you will have the ability to go to the report section of iPrism and see what sites in that category have been contacted. Please note that monitoring consumes resources and this should not be done if you do not have a need or plan to use the information.

**Election 3:**

Does your district need to have different filtering profiles for different times of the day? For instance, you want to block the Adult Sex Education category during the school day but do not want to block access to it during the evening community education classes? If so, list below the time of day that you would like a category unblocked.

Category #	Category Name	Time of Day Category Should <i>Not</i> be Blocked
1. _____	_____	_____
2. _____	_____	_____
3. _____	_____	_____

**Election 4:**

Do you want selected district staff to have the ability to do an "immediate override" if an Internet user comes to them with a valid reason to get to a blocked site?

\_\_\_\_\_ Yes

\_\_\_\_\_ No

If yes, ARCC will provide you with the necessary login and password to facilitate this ability. Before we can do this however, we need to know your district's desire of the maximum time any override would be in effect. Before you select the "system" maximum for your district, please note that your district's selected staff will be able to do "immediate overrides" for periods less than or up to the "system" maximum. With this in mind how long would you like your "system" maximum to be set at?

\_\_\_\_\_ 1 Hour

\_\_\_\_\_ 8 Hours

\_\_\_\_\_ 1 Day

\_\_\_\_\_ 1 Week
